SUMMARY

Computer Science graduate with hands-on experience building backend services in Go and PostgreSQL, developing systems-level software in C++, and administering Linux environments end to end. Delivered complete projects independently across backend, mobile, and systems programming, with practical networking exposure gained through a telecom internship. Seeking Backend or Systems Engineer roles.

EXPERIENCE

Networking Intern — Ethio Telecom

2 Months

- Installed and configured Wi-Fi networks and wired telephone lines for residential and business customers.
- Diagnosed connectivity issues as part of the Network Installation & Maintenance team, ensuring reliable service delivery.

Independent Technical Projects

- **Backend Development:** Engineered REST APIs in Go with PostgreSQL for a full-stack typing tutor application.
- **Linux Systems Administration:** Configured and maintained Linux systems (systemd, LVM, shell scripting) across two distributions, Arch and Mint.
- **Mobile & Cloud Development:** Developed a cross-platform Flutter app with Firebase authentication and cloud data storage.
- **Full-Stack Web Development:** Implemented a Node.js/MongoDB REST API with a React frontend for a media platform concept.

EDUCATION

Bachelor of Science in Computer Science

02/2023 – 06/2026

Addis Ababa, Ethiopia

Addis Ababa University

SKILLS

Coding Languages: Go | C++ | Python | JavaScript | Dart | Rust | PHP

Backend: PostgreSQL | MongoDB | REST APIs | Node.js | Firebase

Cloud & Systems: AWS | Linux | Networking | Bash | systemd | Git | LVM | Docker | Kubernetes

Frameworks: React | Next.js | Flutter

Concepts: OOP | Database Design | Data Structures & Algorithms | Software Engineering | Unit Testing | GitLab CI/CD

Professional Skills: Analytical Thinking | Problem Solving | Communication | Team Collaboration

Machine Learning: NumPy | Pandas | scikit-learn | PyTorch | Machine Learning | Neural Networks | GPU Computing

CERTIFICATIONS

AWS Cloud Practitioner Essentials — AWS Training & Certification

Aug 2026

LANGUAGES

Amharic — Native

English — Fluent

PROJECTS

Selected projects below — full portfolio and source code on github.com/paulGitRoot

Type-Heric

Go • PostgreSQL • React • REST API

A full-stack typing tutor supporting Amharic and English, with a Go/PostgreSQL backend and a React frontend for real-time WPM and accuracy tracking.

TaskFlow+

Flutter • Firebase Authentication • Firestore

A cross-platform Flutter productivity app with Firebase authentication, Firestore-backed task management, local notifications, and habit tracking.

Redis Clone

Go • TCP • RESP Protocol

A Redis-compatible server built in Go from scratch, implementing raw TCP networking, concurrent client handling, and a byte-accurate RESP protocol parser.

Biomedical Disease Classification

NumPy • Pandas • scikit-learn • PyTorch • CUDA

An end-to-end ML pipeline for biomedical disease classification in Python, comparing classical models (Logistic Regression, Random Forest, SVM, Gradient Boosting) against a GPU-trained PyTorch neural network, evaluated via precision, recall, F1, and ROC-AUC.
